

# Lab 1

1. Install MySQL DBMS.
2. Create your mapped tables with their columns.
3.
  - a) Insert your classmates' data (3 rows for each table)
  - b) Add gender column for the student table. It holds two value (male or female).
  - c) Add birth date column for the student table.
  - d) Add foreign key constrains in your tables with options on delete cascade.
  - e) Display students' names that begin with A.
  - f) Display male students who are born before 1991-10-01.
