# Lab 3

The following questions are based on the tables you create in lab 1.

1. Display the date of exam as the following: day 'month name' year.
2. Display the name of students with the year of birthdate.
3. Create hello world function which take username and return welcome message to user using his name.
4. Create multiply function which take two number and return the multiply of them.
5. Create function which takes student id and exam id and return score the student in exam.
6. Create function which take subject name and return the max grade for subject.
7. Create Table called deleted_students which will hold the deleted students' info (same columns as in student tables)
8. Create trigger to save the deleted student from Student table to deleted_students.
9. Create trigger to save the newly added students to student table to backup_students
